Learner Feedback Questions #339

1. Which of the following is NOT a primary goal of patient rounding?
   a. decreases call-bell usage
   b. improves patient safety
   c. improves patient satisfaction
   d. serves as data for nurses’ performance review

2. Current research about rounding says the practice is most effective when done:
   a. hourly during days and evenings; every 2 hours on night shift
   b. every 2 hours, around the clock, including nights
   c. before change of shift
   d. hourly around the clock, including night shift

3. According to the Woodward study, when a California hospital implemented a rounding model, the Press Ganey results were in which percentage of the national reporting data?
   a. top 1 percent
   b. top 10 percent
   c. top 20 percent
   d. top 25 percent

4. According to Meade, et al., patients’ perceptions of quality care include which of the following?
   a. having a bath every day and clean linen
   b. having their call lights answered within 5 minutes
   c. having their physical needs met
   d. knowing the names of the nurses caring for them

5. When rounding is implemented, patients use the call-bell light:
   a. mostly for safety and care issues
   b. excessively for insignificant reasons, as they always did
   c. mostly during the evening and night shifts when there are fewer nurses
d. when they have complaints

6. The biggest barrier to implementing a rounding model is all of the following EXCEPT:
   a. educating large number of nurses
   b. getting staff buy-in
   c. acuity level
   d. additional cost of hiring more nurses

7. The universal question asked before the unit “rounder” leaves a patient’s room is:
   a. Are you comfortable?
   b. Do you need anything else while I am here?
   c. Is there anything you want me to tell your doctor?
   d. Are you satisfied with the care you are receiving?

8. According to Meade, et al., for a rounding program to be successful, which member of leadership/nursing team is most instrumental in getting buy-in?
   a. director of nursing
   b. nurse manager
   c. clinical specialist
   d. staff nurse

9. According to Orr, et al., the best way to implement a rounding program is:
   a. pilot program on one unit
   b. all units at the same time
   c. according to hospital/nursing unit culture
   d. a specialty unit where there is less patient diversity, according to diagnosis

10. Besides falls, research shows which of the following is reduced with patient rounds?
    a. pressure ulcers
    b. medication errors
    c. confusion
    d. anxiety

Evaluation

1. I can summarize how hourly rounding benefits patients, staff and the facility:
   a. strongly agree
   b. agree
   c. neutral
   d. disagree
   e. strongly disagree

2. I can describe different components and elements to hourly rounding programs:
   a. strongly agree
   b. agree
   c. neutral
   d. disagree
   e. strongly disagree

3. I can identify the barriers and difficulties of initiating an hourly rounding program:
   a. strongly agree
   b. agree
   c. neutral
   d. disagree
   e. strongly disagree

4. The objectives relate to the overall goal of the article:
   a. strongly agree
   b. agree
   c. neutral
   d. disagree
   e. strongly disagree

5. The article is well-written and logically organized, and defines terms adequately:
   a. strongly agree
   b. agree
   c. neutral
   d. disagree
   e. strongly disagree
