**Notes:**
- **Product(s):** The product(s) listed may include different types of tests for various diseases or conditions.
- **Sample Type:** The sample types include blood, saliva, urine, and others.
- **Sample Size:** The sample size required for each test varies, ranging from 125 µl to 15 minutes.
- **Security Features:** Features may include patient identification, barcoding, and integrity checks.
- **SD Features:** Specifications may include sensitivity, specificity, and turnaround time.
- **Operations Options:** Options may include easy, clean procedures, waived or simplified procedures, and hospital-grade.
